

Anatomy quiz

Total questions: 11

Worksheet time: 6mins

Instructor name: Hind Shaker

- The pericardial cavity is the space between 2 layers of fibrous pericardium
 - False
 - True
- The last intercostal nerve is called ...?
 - 11th Intercostal nerve
 - subcostal nerve
 - Subclavian nerve
 - vagus nerve
- Choose the incorrect match
 - Posterior 1st , 2nd from superior intercostal artery
 - Posterior 3 -11 from ascending thoracic aorta
 - Anterior upper 6 ribs - internal thoracic artery
 - Anterior 7,8,9 ribs - musculophrenic artery
- Apex of heart is formed by
 - Left atrium
 - Left ventricle
 - Right atrium
 - Right ventricle
- Right coronary artery arises from **the anterior** aortic sinus of ascending aorta
 - False
 - True
- Choose The correct match regarding the pleural cavity
 - Lymph - chylothorax
 - Air - haemothorax
 - Blood - hydrothorax
 - Fluid — pneumothorax

7. What is the origin of sartorius muscle
- a) Anterior inferior iliac spine
 - b) Iliac tuberosity
 - c) Anterior superior iliac spine
 - d) Iliac fossa
8. What are the insertions of rectus femoris muscle ? CHOOSE TWO
- a) Tibial tuberosity
 - b) Head of femur
 - c) Neck of fibula
 - d) Patella
9. What nerve supplies vastus medialis muscle
- a) Saphenous nerve
 - b) Sciatic nerve
 - c) Femoral nerve
 - d) Inferior gluteal nerve
10. Which muscle flexes the knee
- a) Gluteus maximus
 - b) Adductor Magnus
 - c) Rectus femoris
 - d) Sartorius muscle

11. BONUS :) , What is the muscle highlighted in green?

- a) Adductor brevis
- b) Gracilis
- c) sartorius
- d) Vastus medialis

Answer Keys

- | | | |
|-------------------------------------|--------------------------------------|---|
| 1. a) False | 2. b) subcostal nerve | 3. b) Posterior 3 -11 from ascending thoracic aorta |
| 4. b) Left ventricle | 5. b) True | 6. a) Lymph - chylothorax |
| 7. c) Anterior superior iliac spine | 8. a) Tibial tuberosity , d) Patella | 9. c) Femoral nerve |
| 10. d) Sartorius muscle | 11. b) Gracilis | |
