

1) What is the action of ilipsoas muscle ?

- A) flexion of the knee
- B) flexion of the hip
- D) extension of the knee
- C) extension of the hip

2) The diaphragm is supplied by _____ nerve

- A) Radial
- B) femoral
- C) phrenic
- D) sciatic

3) The heart is located in the

- A) superior mediastinum
- B) Anterior mediastinum
- C) middle mediastinum
- D) posterior mediastinum

1) B

2) C

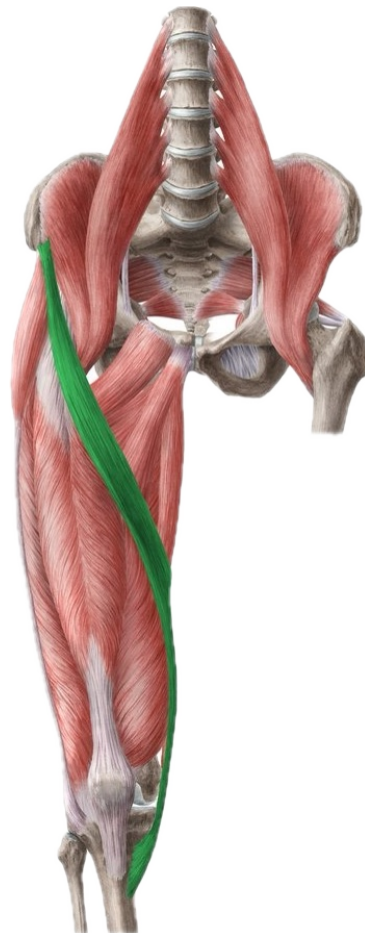

3) C

4) Which of the following quadrants of gluteal region is suitable for intra muscular injection

- A) upper medial
- B) lower medial
- C) upper lateral
- D) lower lateral

5) The green muscle is gracilis muscle

- A) true
- B) False

4) C
5) B

1. Thejoins..... to form right brachiocephalic
- A) right internal jugular veinright subclavian vein
 - B) left internal jugular vein.....left subclavian vein
 - C) superior vena cava Inferior vena cava
 - D) right internal jugular artery.....right subclavian artery

2. The tricuspid valve lies between..... and
- A) right atrium...left ventricle
 - B) right ventricle...pulmonary artery
 - C) left atrium...left ventricle
 - D) right atrium...right ventricle
