

✓ What is most likely spot diagnosis? * 1/1

☐ Cushing Syndrome

☒ Acromegaly

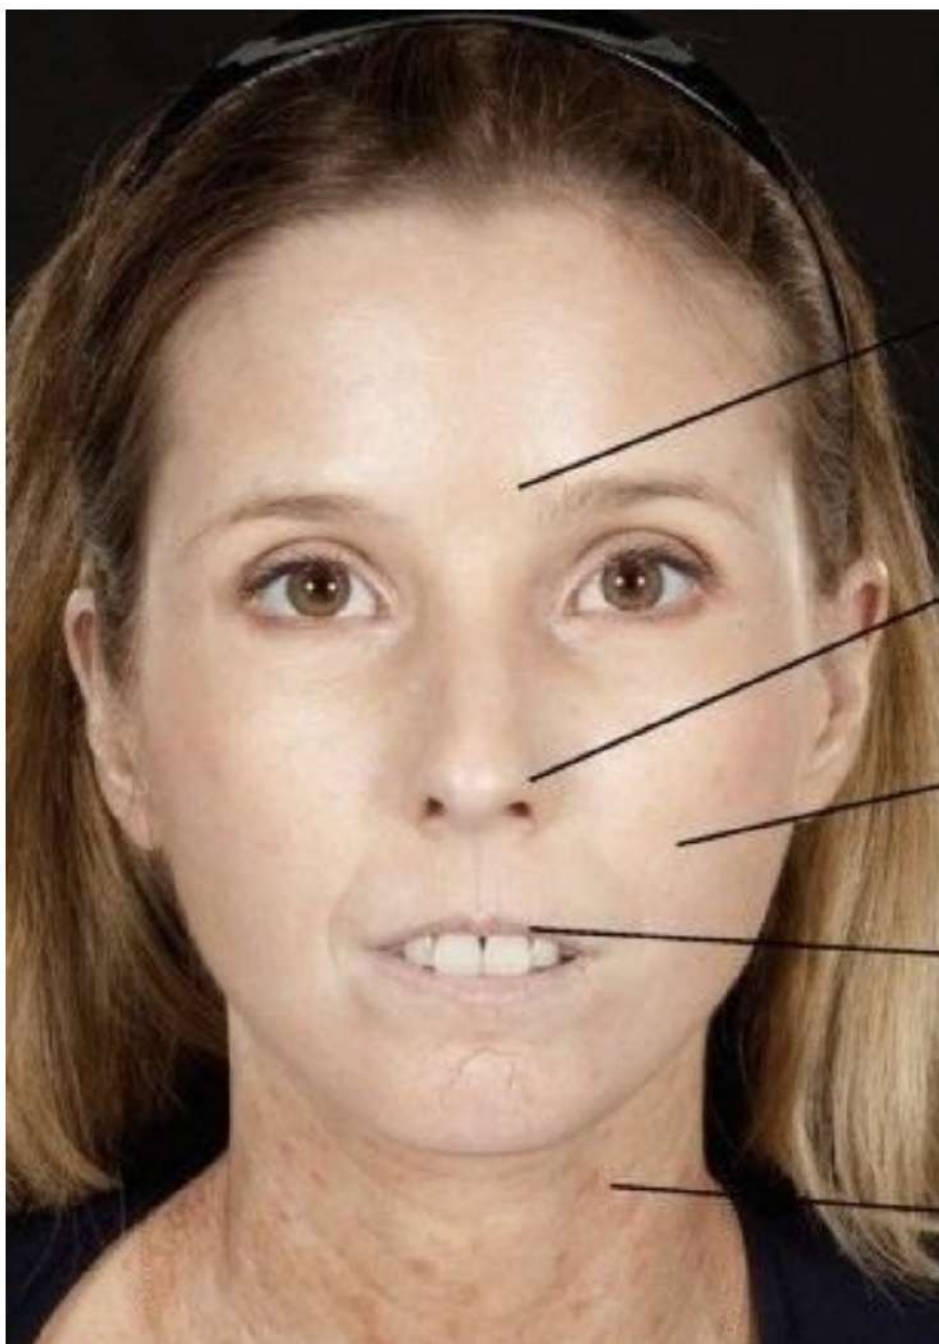

☐ Hypothyroidism

☐ Marfan Syndrome

✓ What is most likely diagnosis? *

1/1

- ☐ SLE
- ☐ Hereditary Hemorrhagic Telangiectasia
- ☐ Hypothyroidism
- ☒ Systemic Sclerosis

✓ Which of the following is NOT a cause of this finding?

*1/1

- ☐ Psoriasis
- ☐ Eczema
- ☒ CKD
- ☐ Lichen Planus

✓ What is this deformity? *

1/1

- ☒ Thenar muscle wasting ✓
- ☐ Hypothenar muscle wasting
- ☐ Arachnodactyly
- ☐ Duputyren's contracture

✓ When asking about smoking, the patient says: "Only socially." What should you ask next? *1/1

☐ "Soo.....zero cigarettes?"

☐ "Do your lungs know it's social?"

☒ "How social are you exactly?" ✓

☐ "Okay, next question."

✓ Where would you expect this findings

*1/1

- ☒ Apical lung tumor
- ☐ Middle lung tumor
- ☐ Lower lung tumor
- ☐ Central lung tumor

Match the disease to the suggestive feature in history *

	Pneumonia or whooping cough in childhood	Fine inspiratory crackles at bases	History of smoking and intermittent sputum	Associated with atopy	Score	
COPD	☐	☐	☒	☐	1/1	✓
Asthma	☐	☐	☐	☒	1/1	✓
Bronchiectasis	☒	☐	☐	☐	1/1	✓
Interstitial lung disease	☐	☒	☐	☐	1/1	✓

Match the respiratory problem to the causative drug *

	NSAIDs	Estrogens	ACE inhibitors	Opioids	Score	
Cough	☐	☐	☒	☐	1/1	✓
Bronchocnstriction	☒	☐	☐	☐	1/1	✓
Pulmonary thromboembolism	☐	☒	☐	☐	1/1	✓
Respiratory depression	☐	☐	☐	☒	1/1	✓

✓ A medical student wears a stethoscope around their neck. This means:

- ☐ They are now a cardiologist
- ☐ They are prepared for anything
- ☒ They may still forget to wash their hands
- ☐ They can diagnose from across the room

✓ Where would you expect to find this *1/1 finding?

☐ Asthma

☐ COPD

☒ Sarcoidosis

☐ Idiopathic Pulmonary Fibrosis (IPF)
